

Customizable Critical Access Hospital MBQIP Performance Reports

MBQIP Dashboards

Hospital Dashboard

Cynosure Health creates a dashboard for each of your participating CAHs providing an at-a-glance view of the hospital's results for each measure, over the most recent four quarters. The state may select their comparators or benchmarks to most effectively assess the hospital's performance against the most appropriate comparatives to drive improvement.

NEW!

Cynosure Health incorporated the Antibiotic Stewardship survey results, reflecting the CAH's response to the seven required element questions, along with the state and national rates.

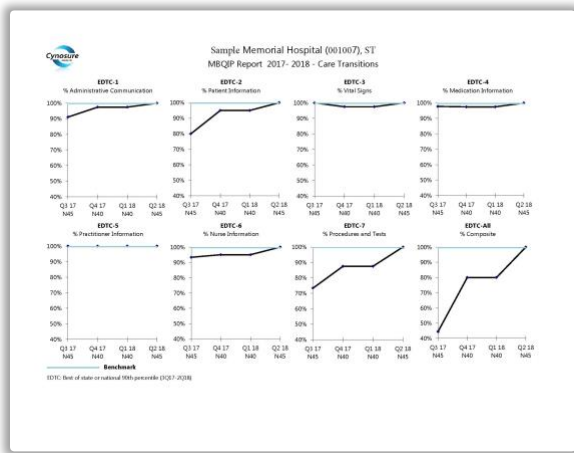

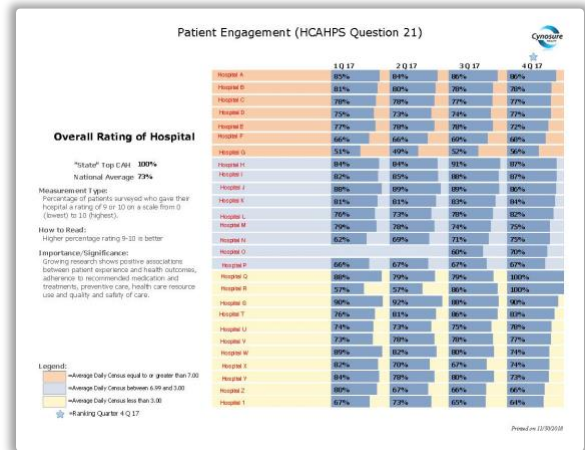

Element	Sample Medical Center 001001	ST	CAH National
Element 1	Leadership Commitment	89%	82%
Element 2	Accountability	100%	93%
Element 3	Drug Expertise	94%	94%
Element 4	Action	94%	95%
Element 5	Tracking	78%	81%
Element 6	Reporting	78%	85%
Element 7	Education	78%	83%
All Elements Met		6 / 7	86%

Ranking Charts

Customizable reports that allow states to segment their CAHs into peer groups. Ranking results by segment may assist in identifying best practices as well as opportunities to further propel improvement efforts.

Run Charts

Run (Line) Charts are created for each domain, providing a visual display of each hospital's performance over time. The number (N) of cases is displayed as well as the primary comparator.

Example: Emergency Department Transfer Communicatoins (EDTC) Run Charts

Statewide Reports

In addition to individual hospital reports, Cynosure Health creates a MBQIP Statewide Dashboard and statewide domain specific Run Charts provide an aggregate display of performance across the participating hospitals within your state.
